

Yeankyung Hahm

Ph.D. Candidate, Department of Landscape Architecture and Urban Planning, College of Architecture,
107B Scoates Hall, Texas A&M University, College Station, TX 77843-3137
Phone: +1-979-326-0747 E-Mail: yeankyung@tamu.edu

Research Interest

- Aesthetic quality of streetscapes and pedestrian perception
- Built environment and human behavior in everyday settings
- Intergenerational interaction and community-oriented urban design
- Urban design and planning policies for health-supportive and age-friendly cities

Education

2021 - Present	Ph.D. Candidate in Urban Regional Science , Texas A&M University, College Station, TX Department of Landscape Architecture and Urban Planning, College of Architecture <i>Dissertation:</i> The Influence of Streetscape Aesthetics on Pedestrian Behavior: A Multi-Layered Analysis of Policy, Perception, and Environment <i>Advisor:</i> Dr. Chanam Lee; Committee Members: Drs. Shannon Van Zandt, Yang Song, Xuemei Zhu
2025	Certificate Health Systems and Design , Texas A&M University, College Station, TX.
2016 - 2018	Master of Landscape Architecture , Seoul National University (SNU), Seoul, South Korea <i>Thesis:</i> Do Built Environments Affect Pedestrians' Choices of Walking Routes in Retail Districts? A GPS-Based Experimental Study in the Hongdae Retail District, Seoul <i>Advisor:</i> Dr. Heeyeun Yoon
2012 - 2016	Bachelor of Landscape Architecture Seoul National University (SNU), Seoul, South Korea

Academic and Professional Experiences

Academic Positions

Present (2025, Fall)	Instructor , Landscape Architecture and Urban Planning, Texas A&M University, College Station, TX
2021 - Present	Graduate Assistant – Teaching (GAT) , Landscape Architecture and Urban Planning, Texas A&M University, College Station, TX

Research & Professional Experiences

2020 - 2021	Researcher , Research Institute of Agriculture and Life Sciences, Seoul National University, Seoul, South Korea
2019	Researcher , Department of Urban Planning, The Seoul Institute, Seoul, South Korea
2015	Intern , Korea Research Institute for Human Settlements (KRIHS), Gyeonggi-do, South Korea

Leadership & Service

2023 - 2025	Lab Manager , Design of Active Living (DrAL), Landscape Architecture and Urban Planning, Texas A&M University, College Station, TX
2022 - 2024	Board Member , Korean College of Architecture (KCOA), Texas A&M University, College Station, TX
2014	30th International Correspondent , <i>Landscape Architecture Korea</i> (LAK) Magazine, South Korea

Research Projects

- 2024 - Present **Design for Health: Age-friendly Communities to Promote Healthy Aging in Place**
College of Architecture, Texas A&M University – Small Grant Program · Project duration: 2024-2026
A pilot study to investigate the relationship between built environment characteristics and intergenerational interaction between children and older adults.
- Contacted senior centers and obtained site access for recruitment
 - Distributed and collected surveys from older adult participants
 - Built partnerships with local staff and communities to support ongoing research efforts
- 2023 - 2024 **Environmental Factors Influencing Intergenerational Interactions in Residential Communities**
Landscape Architecture Foundation (LAF) · Project duration: 2023-2024
A nationwide study identifying built environment factors that support intergenerational interaction between children and older adults.
- Coordinated survey distribution and participant recruitment through local community organizations
 - Collected contact information and built partnerships with community stakeholders
 - First author of a parent survey-based manuscript (in progress)
 - Contributed to a published article (Habitat International, 2025)
- 2022-2025 **Fighting Obesity by Reinventing Public Transportation: A Natural Experiment**
National Institutes of Health (NIH), \$2,591,084
multi-PI: Drs. Chanam Lee, Li, and Ory | Project duration: 2018-2025
A natural experiment evaluating the health and mobility impacts of bus rapid transit (BRT) and exploring barriers and facilitators to its use.
- Processed GPS and accelerometer (ACC) data for travel mode detection and spatial visualization
 - Summarized descriptive statistics from the transit user survey
- 2021-2022 **Urban Green (Infra)structure and Pedestrian Health**
Center for Health and Nature, \$25,000 | PI: Dr. Chanam Lee | Project duration: 2019-2022
A pilot study to develop measurement strategies for quantifying urban nature and its impact on pedestrian health.
- Analyzed head-mounted video data using computer vision to derive objective visual exposure indicators
 - Supported development of metrics linking visual elements to perceived greenery
- 2021-2022 **Physical Activity Impacts of a Planned Activity-Friendly Community: The What, Where, When and Why of Environmental Approaches to Obesity Prevention**
National Institutes of Health (NIH), \$2,684,000
multi-PI: Drs. Chanam Lee, Zhu, and Ory | Project duration: 2015-2022
A longitudinal study examining changes in physical activity behavior after residents move to an activity-friendly community.
- Automated GPS and ACC data processing using a Linux-based system
 - Supported pattern detection and classification of activity behaviors
- 2023 **SCC-IRG Track 2: Digital Twin City for Age-friendly Communities - Crowd-biosensing of Environmental Distress for Older Adults**
National Science Foundation (NSF), \$1,500,000
PI: Dr. Chanam Lee | Project duration: 2021-2025
This project builds a digital twin city model to identify environmental distress among older adults and support intervention design.
- Coordinated service-learning activities with students in a design studio course
 - Facilitated community engagement and project-based learning with local stakeholders
- 2020-2021 **Development of Urban Thermal Environment Management Systems**
Korea Environmental Industry and Technology Institute & Korea Ministry of Environment
PI: Dr. Dongkun Lee | Project duration: 2020-2022
This project simulates urban wind corridors to mitigate urban heat island effects and assesses thermal comfort in outdoor environments.
- Simulated urban microclimate conditions using ENVI-met
 - Conducted EEG experiments to evaluate thermal comfort under various urban scenarios

- 2020 **Multi-scale Spatiotemporal Economic Analysis of Fine Dust**
Ministry of Education & National Research Foundation of Korea
PI: Dr. Euijune Kim | Project duration: 2017-2020
This study examined health outcomes related to air pollution alert systems using statistical modeling.
- Analyzed respiratory disease trends using generalized additive models (GAM)
 - Publication: Environmental Research Letters, 16(6), 064048
- 2020 **A research for the establishment of a platform for abandoned land management, using remote sensing and big-data analysis**
Creative-Pioneering Researchers Program, Seoul National University
PI: Dr. Heeyeun Yoon | Project duration: 2017-2020
A project exploring spatial patterns of farmland abandonment using advanced geospatial methods.
- Analyzed satellite imagery and big data to classify patterns of land abandonment
 - Publication: Habitat International, 129, 102670
- 2019 **10-Minute Living SOC Project**
Seoul Metropolitan Government | Project duration: 2019-2020
A spatial analysis project to identify and improve access to social overhead capital (SOC) within neighborhoods.
- Collaborated with district officials to identify service gaps and planning needs
 - Evaluated underserved areas and built a GIS database of existing SOC infrastructure
- 2015-2018 **Spatiotemporal modelings and guidelines for local retail revitalization**
Ministry of Science and ICT & National Research Foundation of Korea
PI: Dr. Heeyeun Yoon | Project duration: 2015-2018
A behavioral mapping project exploring pedestrian activity in commercial districts to inform revitalization strategies.
- Led GPS-based experiments in retail districts (Sinchon and Hongdae)
 - Managed participant recruitment and on-site coordination
 - Publications: Cities, 89, 1–13; Habitat International, 70, 50–60
- 2015 **Daegu Subway Line 1 Extension Development Plan**
Gyeongsan-si Government
PI: Dr. Myungsoo Kim | Project duration: 2015
A planning study focused on urban development strategies for areas surrounding a proposed subway extension.
- Conducted field surveys and contextual site analysis
 - Summarized planning issues and development potentials for decision-making support

Awards & Scholarships

- 2024 Award of Excellence, Texas ASLA Student Design Awards, WEAVERS Project
- 2021 Top-Off Scholarship & Graduate Assistantship, College of Architecture & Department of Landscape Architecture and Urban Planning, Texas A&M University
- 2016 Best Honor Graduate, Dept. of Landscape Architecture, Seoul National University
- 2015 Excellence in Design, 14th Natural Environment Contest, Ministry of Environment & Korea Association of Ecological Restoration
- 2014 Participation Prize, 11th Korea Environmental Landscape Architecture Exhibition, Korean Institute of Landscape Architecture, 2014

Skills

Graphic Tools

AutoCAD, SketchUp, Adobe Photoshop, Illustrator, InDesign

Analytical Skills & Tools

Intermediate statistical analysis, including Structural Equation Modeling (SEM) and Generalized Additive Models (GAM);
Basic machine learning and computer vision applications using Python (e.g., video analysis, data crawling)
Proficient with ArcGIS, STATA, AMOS, SPSS, R, and NetLogo

Conference

Conference Presentations

- 2025 **Hahm, Y.**, Zhong, S., Chen, X., Yang, H., & Lee, C. The Impact of Physical Activity-Promoting Built Environment on Intergenerational Interactions Between Children and Older Adults. In CELA Annual Conference.
- 2025 **Hahm, Y.**, & Lee, C. Aesthetic Quality of Pedestrian Streetscape: A review of design policies from selected US cities. In CELA Annual Conference.
- 2025 Zhong, S., **Hahm, Y.**, Chen, X., Wang, N., & Lee, C. Environmental Factors Influencing Intergenerational Interactions in Residential Communities: A US Nationwide Survey of Built Environment Experts. In CELA Annual Conference.
- 2024 Zhong, S., Curran, L., Yang, H., **Hahm, Y.**, Prochnow, T., & Lee, C. Intergenerational Communities for Health: Insights from Nationwide Expert Interviews. In CELA Annual Conference.
- 2023 **Hahm, Y.**, Lee, C., Lee, H., Park, A., Li, D., & Ding, Y. Quantifying the Pedestrians' Eye-Level Visual Experience: Using Real-Time Experiment Data. In CELA Annual Conference.
- 2020 **Hahm, Y.**, & Yoon, H. Impact of Air Pollution Adaptation Measures on the Public Health. In ACSP Annual Conference.
- 2020 Yoon, H., **Hahm, Y.**, & Choi, Y. The effect of COVID-19 on sales revenue in Seoul, South Korea: A Spatial Panel Approach. In AGU Fall Meeting.
- 2020 Baek, S., Yoon, H., & **Hahm, Y.** An Assessment of the Spatial Patterns and Characteristics of Farmland Abandonments; A Case of Jeollanam-do Province, in South Korea. In AGU Fall Meeting.
- 2017 **Hahm, Y.**, & Yoon, H. Does Pedestrians' Walking Behaviors Explain the Rise & Fall of Shopping Districts? A Study with GPS Experiments. In ACSP Annual Conference.

Poster Presentations

- 2023 **Hahm, Y.**, Lee, C., Lee, H., Park, A., Li, D., & Ding, Y. Quantifying pedestrians' eye-level visual experience in natural vs. built environments using real-time experimental data. In Center for Health & Nature Symposium.
- 2016 **Hahm, Y.**, & Yoon, H. Built environment affecting visitors' walking choice in commercial areas? A study with GPS experiments. In AGU Fall Meeting.

Teaching Experience

Texas A&M University

Study Abroad Program, Bonn, Germany

2025 Fall

Instructor

CARC 311 Field Study in Urban Planning Design Communications (3 credits)

An advanced course in urban planning design communication focusing on digital graphic tools and visualization for urban design processes.

- Designed and led a course teaching Adobe Illustrator, Photoshop, InDesign, SketchUp, GIS, and Lumion.
- Guided students through assignments on site analysis, conceptual diagramming, land-use mapping, 3D modeling, and booklet design.
- Supervised class discussions and critiques, emphasizing visual storytelling and professional presentation skills.

Teaching Assistant

CARC 301 – Study Abroad Interdisciplinary Design Studio (6 credits)

An interdisciplinary urban design studio focused on landscape urbanism and culture-sensitive design in Bonn, Germany.

- Supported the lead instructor through desk critiques, lecture assistance, and coordination of reviews.
- Contributed to the assessment of design projects across city, district, and site scales.

Texas A&M University

Graduate Assistant – Teaching (GAT)

2024

LAND 620 Open Space and Land Use Planning I (5 credits)

This graduate-level studio focused on the planning and design of community-based open spaces, including Complete & Green Streets and neighborhood parks. Students engaged in two project phases: a short-term street redesign and a semester-long master plan.

- Delivered a guest lecture on GIS analysis for land use planning

2023 & 2022

LAND 412 Landscape Design IV – Capstone Undergraduate Studio (5 credits)

2023 Spring

This capstone studio focused on health-promoting landscapes and involved two externally funded, client-based projects—Hensel Park Redevelopment (\$13,000) and Healing Gardens at S&W Hospitals (\$10,000).

- Contributed to instruction through desk critiques, pin-up reviews, and coordination with client representatives
- Served as **editor** of the final e-book publication for the Healing Gardens project, curating and formatting student work into a professional deliverable
View publication (Google Drive, download required)

2022 Spring

Assisted with two evidence-based studio projects—Active Aging in Place (part of the NSF-funded Digital Twin City project) and Campus Nature Rx—which emphasized walkability, aging, and mental health in design education.

- Supported service-learning activities in collaboration with local stakeholders
- Facilitated student engagement through community-based design processes and environmental health topics

2022 & 2021

LAND 101 Introduction to Landscape Architecture and Urban Planning (1 credit)

- Graded weekly class notes and provided general support for first-year undergraduate students.

Seoul National University

Teaching Assistant

Assisted in instruction for the following undergraduate courses in landscape architecture:

2017 & 2016

Landscape Drawing and Media (3 credits)

2017 & 2016

Theories of Urban Landscape Design (3 credits)

2017

Computer Graphics for Landscape Architecture (3 credits)
